PROFILE

- **Full Stack Developer:** Front-end and back-end development; server management.
- **Five years of experience** in the web industry, preference for startups.

EXPERTISE

Front end development: JavaScript ES6. React, AngularJS, Backbone. Responsive HTML/CSS. Bootstrap.

Back end development: PHP. Zend Framework 2. Doctrine ORM.

Design: Design patterns, REST APIs.

Testing: Jasmine, PHPUnit. Selenium.

Best coding practices: Styling, linting, documentation.

Continuous Integration: Jenkins, Bamboo, Wercker. Capistrano. Git hooks.

Database: MonfgoDB, MySQL, SQL Server. Stored procedures.

Server management: Unix/Linux (Ubuntu). Cloud (AWS, Rackspace, DigitalOcean). Nginx, Apache. Virtualization (Vagrant, Docker). Caching (XCache, APC, Varnish). SSL. DNS. Monitoring (Nagios, Hyperic).

WORK EXPERIENCE

Full Stack Lead Developer [WorkAngel](#) (London) Feb. 2013 - Jun. 2015

- Managed the five engineers front-end team for one year.
 - Deployed the two web apps to production every two weeks, using the Git flow.
 - Focussed on quality by doing systematic code review and enforcing best practices. Mentoring.
 - Lead major changes: Team organisation, switch from Angular to React, code refactoring.
 - A typical front-end web app example can found on [my GitHub](#).
- Hired more than 10 backend and frontend developers.
- Created an admin panel used in production. Full cycle of development involving UX/UI, REST API methods, database design, end-to-end testing and bug fixing.
- Set up an in-house, flexible Jenkins CI server.

Full Stack Lead Developer CFO Lending (London) Jul. 2012 - Dec. 2012

- Developed and deployed corporate LAMP websites with Zend Framework, jQuery, HTML5, CSS3.
- Created new server architecture using Rackspace. Divided hosting costs by 4.

EDUCATION

Master in Management: SKEMA Business School. AACSB & EQUIS accredited (France).

Bachelor in Computer Science (3-year French diploma): Rodez Institute of Technology (France).
